Cypresswood Golf Course
in Spring

Prader-Willi Syndrome (PWS) is a non-hereditary genetic disorder affecting one in 15,000 people. Common traits of PWS include (literally) insatiable hunger complicated by a very slow metabolism, learning disabilities, speech and developmental delays, severe behavioral issues and weak muscle tone.

An enormous THANK YOU!! to all our family, friends and benefactors who supported our fundraising efforts for the Molly's Pub 13th Annual Charity Golf Tournament benefiting our Texas Prader-Willi Association. Your generosity keeps us moving forward with our mission to help all those affected by Prader-Willi Syndrome.

Last year's event was a beautiful day with over forty golf teams! I am incredibly grateful to Molly's Pubs, golfers, sponsors, volunteers, auction participants and donors. Your generous and continued support ensures that our organization can continue to strive for awareness, education, and acceptance of our loved ones with this rare and extraordinarily complex disorder.

Your support for this event made it possible to open two PWS-specific group homes in Conroe. The 13th annual People with Smiles Camp was a huge success. Nearly 60 individuals with PWS had the time of their lives at Morgan's Wonderland Camp in San Antonio. Our 4th bi-annual statewide conference is scheduled for February 1 in Houston. Every dollar matters to us, and you can see your generosity is being put to good use.

We are so grateful to every single person who made this event so successful. TXPWA is committed to our mission and your generosity is so greatly appreciated.
